We are nearly finished with our 2nd church building in three months. We have started construction on another. The money for the church building we are about to finish was given by New Hope Baptist in Gaffney, SC. The church is located in a village called Plastado. The members have been meeting in a temporary building made of Bamboo for the last three years.

The members were so happy to get a new building. They had been praying for a building for the last year and were so thankful for the blessing. The before and after church buildings are pictured here.

It typically takes about two months to construct a church building.

The money for the building we are beginning to construct was giving by Deliverance Baptist Church of Wanda, NC. It should be completed before Christmas.

We also received money for two tricycles to transport people to church. The tricycle will transport ten or more children or several adults. A tricycle will make several trips through the village to pick up children.

We also received the money for two wells. For $200.00 we can dig a well that will provide clean drinking water to the church members. We try to dig a well at every church building we construct. The well will also provide water to others in the village. I am so thankful to the American churches and individuals that give to provide a church building and other needs.

**Needs:**

- Church building.............................$7,500.00
- Tricycle......................................... $1,250.00
- Well................................................$ 200.00
